

Welcome to MotionVibe!

MotionVibe is the Keene Family YMCA's new platform for health and fitness!

This modern and user-friendly software is how members will now register for group exercise classes and reserve time in ChildWatch, the pool, and future programs. **MotionVibe** will enable us to provide an ongoing virtual fitness program through the live streaming classes. Another great feature of this platform is that instructors can now communicate directly with the members who are taking their classes to notify them of cancellations or substitutions.

We are excited to bring the **MotionVibe** technology to our members! Learn how to get started on the next page!
